

Organizing & Cleaning

Challenge Week 8

DRINKING GLASSES AND STEMWARE

- Fancy stemware should be stored in a glass-front cabinet if you have one.
- Everyday drinking glasses should be stored in a cabinet near the sink and/or refrigerator. The glasses you use most often should be on the bottom shelf and the glasses used less frequently on the top.
- Line the shelves with a cushioned shelf liner.
- Keep plastic drinking glasses in a separate cabinet, maybe one that the kids can reach.
- Stemware can be hung upside down in racks designed for this purpose.
- Be prepared to weed out the stuff you no longer use and either put it in your garage sale pile, give to family/friend who could use it, or donate to charity!

There are many unique and efficient ways to organize the stuff in our cupboards! Follow my 52-week challenge on my blog and on Pinterest.
