WASHING MACHINE:

Baking soda and vinegar are the preferred cleaning solutions. Don't use cleaning tools that will scratch the finish of the washer/dryer. Soft toothbrushes and cloths are good to use. Washing machines can get pretty cruddy over the years.

CLOTHES DRYER:

Remove the lint from the lint trap after each time the dryer is used. Clean or replace the dryer duct at least once a year, twice is preferable. Clean the vent in and out.

LAUNDRY ROOM/area:

These items are valuable in the laundry room area: Washer, Dryer, Big farm sink, Clothes racks, Drying racks, Laundry baskets on wheels, a basket for whites, one for dark, one for colors, Shelving and/or cabinets for laundry soap, dryer balls, bleach, stain remover, Ironing board and iron and/or clothes steamer.

By organizing your laundry area, you'll make doing laundry more efficient.
